LEG-0019 - Compliance Report for Incident CI-014

1. Introduction

This document provides a formal compliance report concerning the incident identified as CI-014, associated with the Customer Support department (ID: D-10). The report is issued in accordance with internal compliance protocols and pertains to the resolution of a high-severity incident involving the related contract C-031.

2. Incident Overview

The incident, CI-014, was classified as high severity and has been resolved as of the date of this report. The resolution status is confirmed as true and complete. The incident was directly linked to the contractual relationship established under C-031.

3. Department Details

The Customer Support department (ID: D-10) is headed by Monica Herrera, who holds the role of Head of Customer Support. She is employed at the Brisbane location and manages the department with the cost center code CC-110. Monica Herrera's contact email is monica.herrera@orbitalcorp.com.au.

4. Contract Details

The incident is related to contract C-031, which was signed by E-151 and is set to expire soon, with a start date of 2024-12-11 and an end date of 2027-05-01. The contract value is USD 1,135,749.00. The contract is a Statement of Work (SOW) with vendor Mitchell and Sons, a marketing agency. Mitchell and Sons can be contacted via email at accounts@mitchellsons.com.au. The vendor is associated with project P-030 and has a vendor ID of V-001.

5. Resolution and Compliance

The resolution of incident CI-014 has been confirmed and documented. The incident's high severity underscores the importance of ongoing compliance monitoring and risk mitigation strategies within the Customer Support department. All relevant contractual obligations under C-031 have been reviewed and are being adhered to, in line with corporate compliance standards.

6. Conclusion

This report affirms that the incident CI-014 has been resolved and that all associated contractual and departmental obligations are in compliance. The department will continue to monitor and address potential risks to prevent recurrence of similar incidents.
